

Founded in 1997 as the Behavioral Health Research Center of the Southwest (BHRCS), the PIRE-Southwest center specializes in mixed-methods research and program evaluation. Major areas of research include health and behavioral health policy and service delivery, community-based substance abuse prevention, intervention development and evaluation, and implementation and dissemination science.

CENTER DIRECTOR

Cathleen Willging, Ph.D.
cwillging@pire.org

AREAS OF EXPERTISE

- Community-Based Participatory Research and Evaluation
- Health Disparities Research
- Implementation Science
- Impaired Driving Intervention and Environmental Strategies Evaluation
- Mental Health and Mental Health Services Research
- Mixed Methods Research and Evaluation
- Needs Assessment and Strategic Planning
- Program Evaluation
- Qualitative Research Methodologies
- Randomized Control Trials
- State and Community Capacity-building Research
- Substance Abuse Intervention and Environmental Strategies Evaluation
- Training and Technical Assistance

Our interdisciplinary research team has a strong history of engagement with rural, Latinx, Native American, and sexual and gender minority communities. The PIRE-Southwest center is focused on conducting high quality research to identify and eliminate health disparities through the advancement of policies and programs that change lives. Our scientists collaborate with universities, federal, state and local community organizations, community coalitions, health educators, and health practitioners to study, develop, test, and disseminate innovative and evidence-based ideas, programs, and initiatives that enhance the quality of life for individuals and their communities.

New Mexico Behavioral Health Services Division, Office of Substance Abuse and Prevention

University of New Mexico

New Mexico counties and cities

New Mexico community coalitions and nonprofit organizations

PROJECT SPOTLIGHTS

Seasons of Care

This community-driven, mixed-method study examines experiences with health care and health insurance among American Indian elders (age 55+), a group that has poorer health outcomes and quality of life, and lower life expectancies than all other aging populations in the United States.

<https://nativeelderhealthguide.com/>

LGBTQ Primary Care Toolkit

This toolkit provides primary care clinics with guidance and resources to implement practice recommendations that are likely to improve services for sexual and gender minority (SGM) patients.

RLAS (Reducing LGBTQ Adolescent Suicide)

Study in 38 schools across New Mexico focused on implementation and scale up of six evidence-based practices (EBPs) recommended by the Centers for Disease Control and Prevention (CDC) to enhance school environments for lesbian, gay, bisexual, transgender, and queer (LGBTQ+) youth.
